- Extensive experience on Designing Manual Test cases and Executing Manual Test cases
- Good in communication skills and ability to work independently with minimal supervision and perform as part of a team
- Having extensive knowledge and experience in Software Test Life Cycle (STLC) and Defect Life Cycle.
- Strong Experience on Test Management Tools JIRA, HP ALM.

Experience

JULY 2021 - MARCH 2022

Core RedOne Project |Capgemini India Pvt Ltd, Bangalore- QA Tester

Core Redone project using Agile methodology to enhance an iOS application integrated with the Salesforce platform. Responsibilities included requirement analysis, test design, and execution, ensuring consistency between the iOS app and Salesforce. Coordinated with cross-functional teams and managed defects through root cause analysis and prevention.

Technologies:

Operating Systems: Windows 10, iOS 13.6

Testing tools: JIRA, Test Rail, MS Office, Confluence, Workbench 54.0.0

Software: IOS App, Salesforce CRM and Chrome Web Browsers

Domain: Salesforce

- Conducted sprint-wise testing using Agile methodology, ensuring timely and efficient validation of each sprint.
- Validated Salesforce functionalities through an iOS app and Salesforce cloud, ensuring seamless integration and performance.
- Ensured comprehensive test coverage for all Salesforce requirements, conducting both functional and non-functional testing.
- Reported test execution summaries and daily status reports (DSRs) to stakeholders, keeping them informed of progress and issues.

MONTH 2016 - MONTH 2020
